SOFTWARE ENGINEER

Motivated and results-driven Electrical and Electronics Engineering graduate seeking a challenging position as a Software Developer or Software Engineer within a large organization. Offering a strong foundation in software development, algorithm design, and project management, with a proven ability to enhance efficiency, deliver successful outcomes, and collaborate within cross-functional teams.

PROFESSIONAL EXPERIENCE

King Makers **March 2024 - Present**
Software Engineer

At Kingmakers, I developed a service for the bridge using Node.js, created sync, webhook, and lifecycle developments for Strapi, and rebuilt the project from Next.js to Remix.js. Additionally, I continued development using Next.js, integrated the A/B testing platform VWO, and created unit tests with Jest.

Kanon Gaming **Nov 2022 - March 2024**
Front End Developer

Alongside various backend development tasks with NestJS, I contributed to three different front-end projects using Next.js. I also led the front-end development for two new projects, Casino Loke and Freja Casino, and made various enhancements to both the backoffice interface and the VIP sections of the websites.

Pirelli **Feb 2020 - Sep 2022**
Jr. Software Engineer

In a stock tracking system project, I served as a Jr. Software Engineer, gaining valuable experience in team management, corporate culture, and industry knowledge. I worked with Vue.js, React, MongoDB, Express.js, and GIT.

Goodyear **May 2019 - Jan 2020**
Intern Software Engineer

Prepared and served a variety of beverages with precision and creativity, consistently meeting or exceeding quality standards, and receiving compliments for latte art and presentation.
